

SONECO

GSM Alarm Button

PRESS THE BUTTON FOR HELP

Fast Way to Reach the Nearest Guard or Monitoring Center

Dangerous situations are difficult to forecast. Soneco GSM Alarm Button keeps you and your customers prepared.

Fast Connection to Your Co-worker

Working alone is common today and thus help may be far away and beyond the reach of voice when needed. Soneco Alarm Button sends the request for help beyond any distance, to defined receivers, with a single press of a button. It does not require any installations and it is easy to take with you anywhere you go.

One Button Is All You Need

Emergency is a panic situation for the people affected. A single press with minimal effort and with minimal required attention - it is all you need and all you want in panic. It may also be all you can.

One button does not have to mean less features or functions. You can set 1-3 phone numbers to the device. You can choose the numbers to be called and the number to get the alarm messages to. The device does it all with one push of a button.

Companies and people around the world account on Soneco GSM Alarm Buttons.
